

Access Control + Digital Video Recording = A Winning Combination

RS2 Technologies has partnered with a number of the leading DVR and NVR manufacturers to provide users with integrated Access Control and Digital Video Recording systems in which all elements communicate on the same network. By combining the DVR and NVR products of our integration partners (see list below) with the RS2 system, users can create powerful, customized security system solutions.

By integrating RS2's powerful Access It!® software and hardware with DVR and NVR products from our valued partners, users will enjoy these benefits:

- Display cameras from graphical display maps
- Video playback on demand or tied to alarm/event time and data
- Full PTZ (pan-tilt-zoom) camera control
- Alarm video motion detection
- Live camera view on demand
- IP camera support
- Simple GUI interface for faster incident investigations
- Hyperlink to video from access control history reports

RS2 DVR/NVR Integration Partners:

	Live	Playback	M/D*	PTZ
Costar Video Systems	X	X	X	X
Dedicated Micros	X	X		
Digiop	X	X	X	
Digital Watchdog	X	X		
Exacq Technologies	X	X	X	X
Genetec	X	X		X

*Motion Detection

As shown in the diagram below, users can configure any number of components into an integrated Access Control and Digital Video Recording system through the same

Local Area Network. Camera control and display, video search/playback, and video processing are all accomplished within the same system.

Typical DVR/NVR Network Setup
